

# ALBAC MAT EMERGENCY RESCUE MAT

## THE COMPANY

Global Medics is a family owned company originally established in the 1990's to provide quality product and prompt, professional service to the healthcare market. Ongoing contact with a wide spectrum of medical providers has seen our range expand to include major international brands and our own branded products in four key areas - Aged Care, Theatre/Surgical, Pharmacy/IT and Hospital.

### PARTNERS FOR LIFE

Throughout our history, we have strived to forge ongoing relationships with both our customers and our suppliers, allowing us to better meet your needs and provide the best, most efficient and cost effective solutions to improving medical care for your residents, patients and your own healthcare teams.

Truly understanding what you do and working together in this way, we can help enhance quality of life for all patients.

**GLOBAL SOLUTIONS** Today our range includes a comprehensive supply of medical and healthcare requirements from gloves to wound care, infection control, theatre and surgical items and more that really deliver results.

NOTES 6

[www.globalmedics.co.nz](http://www.globalmedics.co.nz)

Simply, the AlbacMat is an Emergency Rescue Mat designed to slide over all types of surfaces. It is a stretcher like design, with polypropylene filling that when in storage is half the size of a rolled up sleeping bag. Constructed with heat resistant material it is moved by a rescuer, enabling rescues to be performed as fast as physically possible.

### MANUFACTURING

The AlbacMat is constructed from customised materials - including polypropylene board and a lightweight canvas material. These materials have been extensively tested in all types of situations (including strength, flame and heat conducted by CSIRO). The AlbacMat is manufactured to Australian Standards 2755 and has the CE mark (Class I).

The polypropylene board acts as an insulator to the patient and absorbs any concussions incurred while in transit. It also enables the AlbacMat to 'glide' over all types of surfaces. this includes carpet and vinyl, as well as concrete, bitumen and grass, making it simple and easy for rescuers, while being comfortable for the patient.

### DESIGN

- Tapered for patient comfort
- Easily accessible dual straps for securing the patient
- Fluorescent yellow straps for detection in dim lighting
- Foot rest pocket for the comfort and security of the patient.
- Simple instructions are clearly visible on the self storage pocket.
- Three separate handles for individual rescuer's requirements
- Insulated board provides patient protection from uncomfortable surfaces
- Patient can remain on the Albac Mat until the danger has passed and still be treated if required
- Handles provide excellent control on staircases
- Compact design makes storage easy

### ALBACMAT RESCUE MAT

Ideal for Aged Care/Residential facilities & general public use.

### ALBACMAT WITH THERMAL COVER

Larger design for specific use in emergency services and mining areas, but is also suitable where the AlbacMat Rescue Mat is used

### FEATURES:

- Wider design at torso.
- Carry handles, 3 on each side, plus the handles at the head and feet allow for 6 - 8 person carriage if required
- Extra body strap at hips, which then allow straps to form X over torso or can be secure straight across patient at chest, hips and shin
- Thermal Blanket for patient comfort and safe restraint for 'panicky' patients or those who may try to remove themselves from the mat while in transit. It is stored in the foot pocket and can be unrolled over the patients' feet to cover their whole body and then they can be strapped in. You can still use the AlbacMat without using the thermal cover as the patients' feet will still rest in the foot pocket.

### ALBAC MAT HOLDER

Holds four AlbacMats underneath each other of either size for easy storage & quick access. This can be carried to the emergency site where the four mats are ready to be used immediately.

First designed in 2002 for the Aged care/hospital markets, the AlbacMat Rescue Mat is widening its market appeal to include Defence, Emergency Services and Mining industries. Other markets are continually opening up. Each person spoken to has another place where the AlbacMat can be Used to aid in the movement of injured people...the possibilities are endless.

**The AlbacMat Emergency Rescue Mat has been designed with safety, for both the rescuer and patient being of paramount importance.**

### **SAFE...**

The AlbacMat has been designed with Safety, for both the rescuer and patient being of paramount importance.

### **EFFECTIVE...**

The ability of the AlbacMat to travel easily over most surfaces - including stairs, carpet and concrete allows for improved efficiency when evacuating a facility.

### **SINGLE PERSON OPERATION...**

Evacuations can be performed by one person per patient in most situations which is essential when time is critical.

### **USE IN ANY LOCATION...**

The AlbacMat is totally independent of its environment. It does not matter where the patient may be in bed, the bathroom or the corridor, they can still be placed onto the AlbacMat and taken to safety.

### **READY FOR INSTANT USE...**

Its compact, self storage and lightweight design means it can be readily available in varying locations for instant usage. With 2 designs/sizes now available, please read under product range to find which one best suits your requirements.
