

CLINELL ALCOHOL HAND SANITISER

ALCOHOL HAND SANITISER GEL

INSTANT HAND SANITISER WITH 70% ALCOHOL

The Clinell Hand Hygiene range is developed by doctors to instantly sanitise hands and kill 99.999% of germs.

The Clinell alcohol gel contains a unique formula, which combines 70% alcohol and additional biocides offer a superior level of effectiveness against germs. With added moisturisers, aloe vera and green tea extract to promote healthy skin.

This alcohol gel has a unique combination of aloe vera and green tea moisturisers revitalising the skin without leaving the hands feeling sticky. Compare this to other hand rub gels and you'll see and feel the difference.

A 50ml presentation is available with a retractable cord with a **PVC Strap** so that it can be attached to a belt or pocket. This is ideal for nurses on the move. The 50ml and 100ml flip-top are handy pocket size bottles that can be on hand at all times, in your pocket, handbag or on your desk.

The 250 ml and 500ml pump presentation can be placed on a surface, hung over a bed end or trolley, or attached to a wall so that it can be easily removed for autoclaving. A bracket, especially designed in New Zealand is available.

Hand sanitisers are not designed to replace soap and water hand washing, but form an integral part of the WHO hand hygiene guidelines to be used where access to soap and water is difficult.
