

# NOROVIRUS IS HIGHLY CONTAGIOUS

## PREVENTION IS THE BEST CURE!

Norovirus is the most contagious of all viruses and very tough to beat. A member of the Calici virus family it has a very tough protein outer coat compared to other viruses like influenza. As few as 10 viral particles can initiate a Norovirus infection and transmission occurs through ingesting contaminated food or water and by person to person contact. Norovirus can also be aerolised from sufferer's vomit and the virus continues to be shed from patients days after symptoms disappear.

There is no vaccine or other effective treatment.

Prevention is the best and only cure and Global Medics has a whole range of products to help you say 'No to Norovirus' in your healthcare facility.

# CLINELL WIPES - PROVEN TO KILL AT LEAST 99.999% OF GERMS WITHIN 30 SECONDS!

Wipes and sprays with a mixture of active ingredients other than alcohol can kill Norovirus on surfaces and hands. These Clinell highly effective disinfecting and sterilising products all have a patented formulation of 9 active ingredients which kills Norovirus quickly and effectively on hands and surfaces. Extensively tested in recognised independent laboratories, Clinell are the most effective wipes for hands, surface, equipment, cleaning and disinfecting in one step.

- Effective at 30 seconds with residual activity for 72 hours with a log 5 (99.999%) kill
- Clean and disinfect in one easy step
- With a convenient dispenser which ensures that you only touch the wipe you take
- Can be used on soiled hands unlike alcohol gel rubs which can only be used on physically clean hands
- Safe for use on all plastic and rubber equipment, stethoscopes, blood pressure cuffs and otoscopes, all of which can carry infection
- Universal Wipe is non-selective, minimising development of resistance
- Studies and detailed information regarding efficacy available from Global Medics

# PREVENT THE SPREAD OF INFECTION IN BEDDING

## DISPOSABLE LINEN

Global Medics disposable linen prevents the spread of infections carried in bedding. Manufactured from soft, flame retardant, recyclable SMS, this range of fitted and flat sheets and pillowcases provides both hygiene and cost effective bedding.

The range of fitted and flat sheets and pillowcases offers a number of attractive features.

- Feels softer and durable
- Water and blood resistant
- Removes issues associated with collection, washing and cleanliness of reusable linen
- Elastic sewn all around on the fitted sheets which allows the fitted sheet to fit various widths and lengths

### SINGLE BED FITTED SHEET

Dark blue. 190cm x 90cm x 20cm deep  
D SMSI9090-25

### FLAT SHEET

Light blue. 200cm x 70cm  
D SMSA20070-40

### PILLOWCASE WITH FLAP

Light blue. 75cm x 50cm  
D SMSPC-450

### IMPERVIOUS TO AIR AND FLUIDS - WIPE CLEAN PILLOWS

Full size B WHCS / Half size B WHCST

These pillows come with an antibacterial, waterproof PVC cover which is heat sealed on all edges so no air or fluids can enter or leave the pillow. They eliminate the need for a separate pillow and case, whilst significantly improving infection control. Full size B WHCS / Half size B WHCST

- Waterproof cover that you simply wipe down to keep clean and disinfect
- Ideal for infection control in high risk areas
- Permeable and breathable
- Fire retardant, bacteria resistant, latex free cover
- Can be wiped with diluted hypochlorite solution or 70% alcohol

# PREVENT PERSONAL EXPOSURE TO VIRUSES

When attending patients with Norovirus, or those suspected of carrying the virus, disposable protective clothing is a must. Use wherever risk of infection is high, will ensure your staff are not only protected against exposure to viruses but also that these viruses are not carried from patient to patient, room to room.

### MEDICAL GRADE DISPOSABLE GOWNS

- Protect against fluid exposure
- Lightweight and comfortable
- Secure waist and neck ties

### GARRISON LATEX GLOVES

- Highest protection against all infections
- Excellent flexibility and strength
- Anatomically shaped, natural comfort
- Lightly powdered
- Powder Free

S 85610, M 85630, L 85650

S 85610PF, M 85630PF, L 85650PF

### DUCK BILL P2 DISPOSABLE MASKS

- Superior level of filtration/protection
- Strong and durable
- Low breathing resistance
- Fits various face sizes comfortably

05105 P2

### DISPOSABLE POLYETHYLENE APRONS

- Ideal where frequent changes are required
- Packed for easy dispensing
- 1160mm x 635mm x 30 micron

# PREVENT THE SPREAD OF GERMS

## Care Bag Commode Pan Liners and VOM Vomit Bag

The Care Bag range of products uses the Gelmax Absorb System which absorbs any fluids then solidifies, to reduce odours and prevent any problems of spillage.

### VOM SINGLE USE SICK BAGS

The hygienic, safer to use solution. The draw-string closure and unique absorbent sheet solidifies vomit so it can be easily disposed of with the least risk of cross contamination. For outbreaks, emergencies, in schools and hospitals.

7733987

### CARE BAG BEDPAN/COMMUNE

Also with Gelmax to hold and absorb body waste, solidifying faeces and controlling odours for safe, easy disposable. With drawstring top. Minimise hazards to staff and the transmission of infection. Can be used with commode or over a toilet pan to prevent direct contact with toilets.

7711141

## LOWER THE RISK OF NOROVIRUS TRANSMISSION IN YOUR FACILITY

- 1 BE METICULOUS ABOUT HAND HYGIENE**  
Wash hands regularly and use Clinell Sanitising Wipes or Spray before and after patient contact. Wear protective single use clothing.
- 2 DISINFECT EQUIPMENT REGULARLY**  
Because Norovirus particles live on medical equipment, hand rails, blood pressure cuffs and other surfaces days after a patient's symptoms have ceased.
- 3 REGULARLY WIPE SURFACES PATIENTS OR RESIDENTS ARE IN CONTACT WITH**  
Ensure their hands are regularly washed.  
Provide a Clinell Hand Hygiene Wipe on their food trays.
- 4 PROVIDE CLINELL ANTIBACTERIAL HAND HYGIENE WIPES FOR ANYONE ENTERING THE FACILITY**  
One third of all people infected with Norovirus are asymptomatic, but act as carriers. Keep all toilet areas and bathroom surfaces clean and disinfected.

Thank you for taking the time to read how you can combat Norovirus. If you have any further questions, please do not hesitate to contact us.
