Single Patient Use Tourniquet

The tourniSTRETCH from ASep Healthcare was developed by Healthcare Professionals to provide users with a premium Single Patient Use tourniquet for everyday use, challenging blood sampling and venepuncture. Made from a customised material, it provides users with strong, secure stretch for optimal tensioning whilst maintaining a soft flexible feel for improved patient experience. It's intuitive pull through system, easy re-adjustment and quick release provides professionals with easy application and assists in single-handed operation when blood sampling.

Instructions

Pass TourniSTRETCH round the limb peg side up

Feed tail through buckle and tension accordingly

Pull tail back over the peg to secure in position

Product Code: **Tourni-ST**

Integral Resealable dispenser pack

Contains 25 Single Patient Use tourniquets

Single pack option for clean storage for each patient
